

# COLOR TEMPERATURE RANGES

Produces a nice and cozy warm white light. This temperature is perfect for intimate settings such as an outdoor living room, outdoor kitchen, or for decorative outdoor lighting.

Produces a gorgeous cool white light that is bright and vibrant. This temperature is perfect for settings where visibility is vital such as stairs, sheds, and outdoor workshops.

Produces a crisp and clear light that imitates daylight. This temperature is perfect for settings with a lot of detail such as water features and security lighting.
